

The *Journal of Statistical Physics* accepts original and review papers in the fields of statistical mechanics and thermodynamics of equilibrium and nonequilibrium processes. Papers on plasma physics, nonlinear dynamics, biology, stochastic processes, fluid dynamics, and chemical physics are also accepted provided they are of general interest in relating macroscopic behavior to microscopic interactions.

The general criteria for contributions are as follows. Papers should present important new results, and review papers should provide new insights. Clarity of presentation is important in all cases but, in many cases, particularly for review papers, it is the decisive criterion for publication. Each paper should be written in such a way that a clear understanding of the problem and of the results can be obtained from the abstract and introduction. Given that a paper meets these criteria, shorter papers are greatly preferred to longer ones. In summary, the journal publishes papers with important new results or insights written clearly and concisely.

The journal also accepts communications in the following departments: news of meetings, questions and answers, book reviews, and letters to the editor.

EDITOR-IN-CHIEF

Joel L. Lebowitz, Department of Mathematics, Rutgers University, New Brunswick, New Jersey

EDITORIAL BOARD

Michael Aizenman, Rutgers University, New Brunswick, New Jersey
John M. Deutch, Massachusetts Institute of Technology, Cambridge, Massachusetts
Jean-Pierre Eckmann, University of Geneva, Geneva, Switzerland
M. H. Ernst, University of Utrecht, The Netherlands
Mitchell Feigenbaum, Los Alamos National Laboratory, Los Alamos, New Mexico
Leo S. Garcia-Colin, Universidad Autonoma Metropolitana, Mexico
Sheldon Goldstein, Rutgers University, New Brunswick, New Jersey
Robert B. Griffiths, Carnegie-Mellon University, Pittsburgh, Pennsylvania
Christian Gruber, Laboratoire Physique Theorique, Lausanne, Switzerland
Jean-Pierre Hansen, Laboratoire de Physique Theorique des Liquides, Paris Cedex, France
Malvin H. Kalos, New York University, New York, New York
Elliot H. Lieb, Princeton University, Princeton, New Jersey
I. M. Lifshitz, Academy of Sciences, Moscow, USSR
Shang-Keng Ma, University of California, La Jolla, California
Hazime Mori, Kyushu University, Fukuoka, Japan
Charles Newman, University of Arizona, Tucson, Arizona
Gregoire Nicolis, Université Libre de Bruxelles, Bruxelles, Belgium
Errico Presutti, Università di Roma, Roma, Italy
Howard Reiss, University of California, Los Angeles, California
Lawrence S. Schulman, Technion, Haifa, Israel
Ya. G. Sinai, Landau Institute of Theoretical Physics, Moscow, USSR
Bernard Souillard, Centre de Physique Theorique, Palaiseau, France
Thomas Spencer, New York University, New York, New York
Herbert Spohn, Rutgers University, New Brunswick, New Jersey
Dietrich Stauffer, Institut für Theoretische Physik, Zulpicher Strasse, West Germany
Michael J. Stephen, Rutgers University, New Brunswick, New Jersey
George H. Weiss, National Institutes of Health, Bethesda, Maryland
Benjamin Widom, Cornell University, Ithaca, New York

BOOK REVIEW EDITOR

George H. Weiss, National Institutes of Health, Bethesda, Maryland

Journal of Statistical Physics is published monthly by Plenum Publishing Corporation, 233 Spring Street, New York, 10013. Subscriptions orders should be addressed to the publisher. *Journal of Statistical Physics* is abstracted or indexed in Applied Mechanics Reviews, Current Contents, Energy Research Abstracts, Engineering Index, INSPEC—Physics Abstracts, Mathematical Reviews, Referativnyi Zhurnal, and Science Citation Index. © 1983 Plenum Publishing Corporation. *Journal of Statistical Physics* participates in the Copyright Clearance Center (CCC) Transactional Reporting Service.
